## Your Trusted Service Partner

DC Power Systems require services from start to finish to ensure proper continuity of operation. Unplanned downtime from DC Power System failure can be disastrous to your organization's operations and reputation. RedHawk Services, LLC understands how critical it is to keep electrical systems up and running, with minimal downtime and the highest levels of safety.

As a value-added service subsidiary of the Arthur N. Ulrich Company, RedHawk Services, LLC offers a wide range of DC Power System support services including (but not limited to):

-  ***Battery & Charger Installation & Commissioning***
-  ***Balance of System Installation***
-  ***Battery Removal & Recycling***
-  ***Preventative Maintenance***
-  ***Safety Training***

# Capabilities & Expertise

We pride ourselves in staying current with applicable regulations, codes & standards in addition to best practices and lessons learned from real-world experience. Our technicians follow standards published by the Institute of Electrical and Electronics Engineers (IEEE), National Fire Protection Association (NFPA®), North American Electric Reliability Corporation (NERC) and Battery & Charger Manufacturers.

## **Battery & Charger Installation & Commissioning**

Our installation and commissioning service is designed to ensure your DC Power System is properly setup from Day 1. We make sure equipment is set to appropriate factory settings and make any adjustments to meet your specific requirements.

## **Balance of System Installation**

We can facilitate the install of “balance of system components” including battery racks, enclosures, cabinets, spill containment systems and more to complete your DC Power System.

## **Battery Removal & Recycling**

In line with regulations and our own commitment to preserving the environment, we can facilitate the safe and proper removal and recycling of both lead acid and nickel cadmium batteries with applicable documentation for record keeping.

## **Preventative Maintenance & Repair**

We can provide monthly, quarterly, semi-annual and annual preventative maintenance services to prolong the life of your DC Power System, ensure proper operation and aid in determining the need and timing of future replacement. We can also provide battery load testing and perform on-site analysis and repair of charger control boards, display screens and capacitors.

## **Safety & Operation Training**

Our safety and operation training program provides service personnel with the knowledge, tools and skills needed to safely operate and maintain DC Power Systems. We can provide training on-site or online per customer needs.
